The M1CFP100 is a "tri-speed" 100/40/10G test module for our XenaCompact and XenaBay chassis. Via a simple software setting, it can be used as a single 100G test port, two 40G test ports or eight 10G test ports. This flexibility and price/performance makes it idea for BERT, load-stress, and functional testing of Ethernet equipment and network infrastructure.
