InfoVista Xeus Pro

Powerful Subscriber Insight for Smarter Network Optimization

Xeus Pro is a powerful PC based solution, designed by InfoVista to intelligently post process and analyze multiple network data's including, traffic measurement recording (call trace) data, network configuration data, statistics and drive test data. As a daily optimization support GIS software, this state of the art solution integrates seamlessly in to daily operations and network expansion activities, performing smart analyses whilst detecting common radio problems that compromises your networks Quality of Service. With built in best practices for RF network optimization, detailed analysis for issues such as data throughput, abnormal call events and optimization towards systemic issues such as pilot pollution, overshooting cells and missing neighbours, as well as KPI report generation are simplified and executed faster.

Why Xeus Pro?

Every RF Engineer Deserves one

Every RF Engineer deserves access to good tools. With Xeus Pro, you never have to wait in line to optimize your network due to limited access to key systems. Xeus Pro is lightweight yet efficient, enabling it to be installed into your own personal computer/notebook. The end result, increased accessibility amongst optimization engineers.

Maximize your Revenue with Optimum Service Quality

Xeus Pro provides optimization engineers state of the art built in algorithms and workflow to enable them to improve their engineering response time in solving RF problems. The end results; increased revenue, Improve QoS, satisfied customers, reduce churn.

Future Proof Yourselves

Xeus Pro was designed with scalability in mind. As technology evolves to LTE and beyond and new market requirements emerge, Xeus Pro's flexibility ensures its future relevance with a market-driven feature roadmap to be integrated into later product releases.
Best in Class Usability

Xeus Pro's design philosophy on usability is based on years of actual hands-on experience from worldwide consultants and product feedback from our customers on key aspects of their work. Its intuitive GUI enables optimization engineers to rapidly get up to speed and their job done without the need for extensive training hours.

Multi-vendor Multi-technology

With Xeus Pro, operators worldwide are assured that they need not worry about their current vendor preferences as well as cross- technology constraints as this tool brilliantly works with multi- vendor networks and support all relevant radio access technologies.

Reduce Total Cost of Ownership

Xeus Pro brings network operating cost down by reducing engineering resources needed to perform root cause analysis and daily optimization tasks for quality of service affecting issues.

Powerful Daily Optimization Platform on your Desktop

Comprehensive and Advance Analytics Capabilities

User Friendly, Modular and Flexible

InfoVista Xeus Pro

Exceptional Data Visualization Capabilities

Enhances Optimization Workflow

Built with the Individual RF Engineer in Mind

Specific Modules for Specific Needs

Designed to boost daily optimization efficiency, the various add-on modules propel Xeus Pro to be the powerful desktop solution that it is. Total flexibility to tailor it's functionalities according to specific needs , up-to-date multi vendor & multi technology support across all relevant technologies and a market driven feature roadmap ensures Xeus Pro's relevance now and in the future.

Traffic Measurement Recording (Call Trace) Modules

Unprecedented insight into the precise root cause of problem areas of your network via smart analyses of real calls made by subscribers. Supports all major vendors across 3G & LTE networks.

QoS Analysis

User Quality Management

GeoAnalysis

Network Optimization

Task Automation Module

Automatic parsing of multiple call trace logs simplifies and speeds daily monitoring tasks with centralized access of processed data to everyone in the optimization group.

Automation

Workgroup

Drive Test Module

Powerful & fast analytics of drive test data from multiple drive test equipments for daily optimization and reporting.

Benchmarking

Network Optimization

Network Troubleshooting

About InfoVista

InfoVista is the leading provider of IP and RF planning, assurance and optimization software solutions and services that enable efficient network and IT transformations. Our award-winning solutions empower communications service providers and IT-intensive enterprises to deliver high-performing and differentiated services while cost-effectively planning, operating, optimizing and monetizing their network. InfoVista's combined expertise and technology innovations in radio and IP networks provide more than 550 customers worldwide with a new level of network intelligence, visibility and control across the entire network life cycle. Using InfoVista's solutions, they deliver optimal quality of service, ensure a high-quality user experience, invest appropriately and consolidate their OSS/BSS ecosystems while keeping total cost of ownership as low as possible. For more information, please visit **www.infovista.com**.

InfoVista®
Plan. Operate. Optimize. Monetize.
