are the keywords for success.

Modular
walk-in chambers 📶

ACS is proud to announce the **new release** of its standard modular walk-in chambers.

Besides their well-known key features - **modularity**, **flexibility**, **easy assembly** - these chambers are now equipped with the new cutting-edge **MyKratos™** control system, which makes it possible to manage, monitor and assist the chamber from mobile and desktop devices using Wi-Fi, Ethernet, or mobile network connections. This line of chambers comes in both thermostatic (temperature only) and climatic (temperature and humidity) versions.

- fast delivery
- easy to assemble and disassemble
- rapid upgrade
- simple to refurbish
- remote assistance 24/7

Mix and match to better fit your needs

Without compromising our high standards of quality and reliability, we wanted to reduce delivery times and avoid the costs of design and engineering normally associated with the customized walk-in chambers.
Modular design is the solution.
A cost-effective, modular design comprising the four basic elements of a walk-in chamber that can be mixed and matched to provide a configuration to suit most requirements.

4
1 Test Room Construction

Vapor tight prefabricated panels suitable for multiple assembly and take down operations, AISI 304 interior, blue plastic coated zincor steel exterior. Insulation thickness: 120 mm.

2 Cooling Unit

Comprising the cooling unit and the humidification system required for the control of temperature and air humidity inside the walk-in chamber. The basic version requires either mains water or tower water for cooling.

3 Air Treatment Unit

Powerful fans draw the chamber air across the heat exchangers for cooling and dehumidification, heaters and control sensors before recirculating the conditioned air back into the chamber. A Pt100 sensor (temperature) and a capacitive probe (humidity) are used for control.

4 Innovative Control System

Industry demands smart solutions for managing and maintaining distributed networks of people, machines, and processes. The ACS solution for the Internet of Things is the **unique-in-the-market MyKratos™ software**, making it possible to manage, monitor and assist a test chamber in any place at any time, from mobile and desktop devices, using any kind of connection (Wi-Fi, Ethernet or mobile networks).
Modular
walk-in chambers make your life easier!

✓ Flexible and modular design for a wide production range.

✓ Strong standard floor 3000 Kg/m^2.

✓ Robust self-supported structure.

✓ High degree of customization through many accessories (portholes, door inspection windows, double wing door).

✓ Quick assembling on site.

✓ Quick disassembling to relocate or rebuild the chamber if necessary.

✓ Easy upgrading and refurbishing thanks to unit plant and air treatment modularity.

Check out our video about easy assembly at

Modular
walk-in chambers

Customized walk-in chambers

A wide range of solutions are available for any customer requirements.
Our company has extensive experience in supplying equipment for applications in such diverse fields as electronics, aeronautics, automotive, home appliances and defence.

Walk-in chamber equipped with indirect cooling system to test specimen (base station) with high heat dissipation

Walk-in chamber for rain tests

Walk-in chamber for tests on satellite antennas and panels

Calorimeter to measure the efficiency of air conditioning systems

Focus on basic features

Modular walk-in chambers come with a wide range of included accessories

Basic Configuration

- **MyKratos™** including **MyAngel24™**
- Single wing door
- **Skidproof floor:** stainless steel floor with anti-slip surface treatment
- **Closing:** mechanical
- **Thermostat:** max./min. digital thermostat with independent probe
- **Auxiliary contacts** (specimens, alarms)
- **Interface:** Ethernet port for remote control system connection and USB port for operator panel
- **Water condenser**

Options

- **Inspection window for single wing door:** multiple-crystal, with double heated transparent film, 450x450 mm size **1**
- **Double wing door:** with 2 heated multi-pane windows with double transparent film, 450x450 mm size **2**
- **Additional portholes:** no. 2 Ø150mm portholes, number and positions available as per drawings **3**
- **Set of 4 input PT100 (max 1 set)** (no. 1 set max)

- **Set of no.4 analogic inputs:** 0÷10V for user's data acquisition (no. 1 set max)
- **Set of no. 8 auxiliary contacts** (no. 1 set max)
- **No break power unit for PLC**
- **Specimen switching off** in case of chamber alarm
- **Remote air condenser**
- **MyKratos™ Multichamber software**: installed on a PC, for monitoring and control multiple chambers (to be supplied upon request)

1 Inspection window on the door
2 Double wing door

**3** Panel with n°2 portholes (Ø150 mm internal size)

Modular
basic elements

Test room

|	Useful capacity (m³)	Internal dimensions approx. (mm)			External dimensions approx. (mm)		
		Width	Depth	Height	Width	Depth	Height
Compact	**10**	2120	1820	2560	2360	2060	2800
Medium	**16**	2120	3000	2560	2360	3240	2800
Large	**30**	3300	3640	2560	3540	3880	2800
Extra large	**40**	3300	4820	2560	3540	5060	2800

Compact

Medium
Large

Extra large

Single wing door useful dimensions: 900x1900 (WxH)
Double wing door useful dimensions: 2000x2000 (WxH)
Portholes are positioned in the center of the panel at fixed height.
The drawing shows the right side panels, but the same configuration is available also on the left side.
Right and left panels having the same dimensions, either blind or with Ø150 mm portholes, are interchangeable.
The double porthole panel position and side can be decided by the customer during installation.
Each test room standard size is compatible with any air treatment unit type.
Air treatment units dimensions: 1965x800x570 mm (WxDxH)
Cooling units dimensions: 2000x1210x2070 mm (WxDxH)

Air treatment and cooling units

Capacitive probe (electronic system)
Direct humidification takes place
by means of an electric humidifier
placed in the cooling unit and a steam
distributor located in the air treatment unit.
Dehumidification takes place
in the air treatment unit through
a dedicated battery.

mykratos
an intelligent Control System
ready for the Future

Thanks to their hyper-connectivity, ACS test chambers can match current and future needs related to the new demands of the Industrial Internet of Things and Industry 4.0 for integrated, interconnected and communicating machines.

Embedded Control Software

MyKratos™ inside, to control monitor and assist the chamber. No additional hardware or software required

Free App

to fully manage the chamber via mobile devices (Google Play and Apple Store)
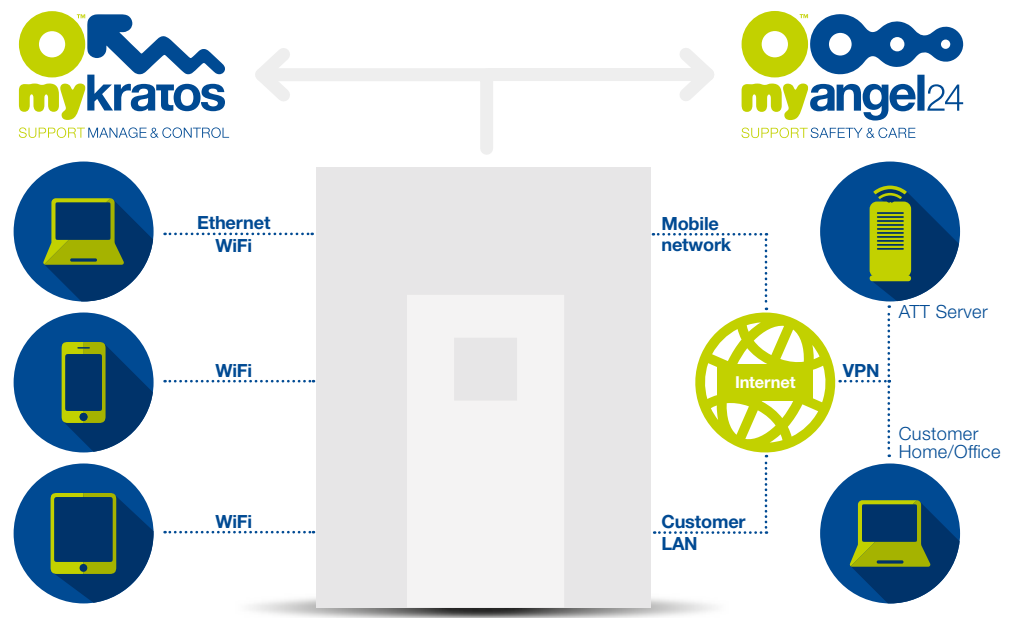

Easy remote access and control

via integrated Wi-Fi / mobile network and Ethernet

Chamber Internal Cloud

for data storage

The chamber is equipped with a **PLC** (Programmable Logic Controller) for managing all the chamber's functions and safety interlocks. A special component controls the chamber via "mobile" devices, such as Tablets and Smartphones, or by establishing a remote Internet connection. The HMI system consists of an on-board panel **(KeyKratos Evo)** and a remote control **(MyKratos™** including **MyAngel24™)** connected to the chamber.

MyKratos™
control system

MyKratos™ control software makes it possible to manage, monitor and assist the chamber anywhere, at any time, in multiple ways (Wi-Fi, Ethernet, mobile network) via mobile and desktop devices. The chamber wireless (Wi-Fi) connection permits operation using tablets and smartphones (iOS or Android compatible). The operator interface can also be remotely accessed through a chamber connection to the client's LAN or via mobile network (on activation of a SIM card data). It includes the **MyAngel24™** interactive assistance system.

Main features
- Wi-Fi or Ethernet connection to the chamber
- Visualization and graphical analysis of measures and recordings
- Synoptic charts of the entire system
- Multilanguage support
- High configurability of chamber parameters
- Unlimited measures recording possibilities
- Program and Manual chamber operation modes
- Delayed start of a program
- Possibility to select more than one chamber from a single Tablet: secure access by means of multiple password levels
- Automatic notifications of event and alarms
- Archive manager for easy access to the stored recordings
- Possibility to send email notification
- Possibility to send SMS notification (SIM card required)
- Multi-chamber management
- System available in several languages

Additional S/W tools for an Easy Integration of ACS test chambers in Test Labs

Communication drivers for an easy integration into customer-developed Serial or Ethernet based applications, (LabVIEW, LabWindows CVI, Microsoft.NET, Visual Basic 6, etc…) can be supplied on request. The drivers come with a set of examples written in Visual Basic 6, LabView, LabWindows CVI, VB.NET, and permit total interaction with ACS test chambers, for both reading and writing.

Our communication protocol - ModBUS RTU for serial or Fetch/write for Ethernet communication, can be supplied to allow any chamber connection using the customer's own programming languages and operating systems.

MyAngel24™
interactive assistance system

SMS notifications

MyKratos™ software includes the innovative ACS interactve assistance system **MyAngel24™**, operating via mobile network wireless connection, complete with SIM card. This makes it possible to access the operator interface remotely via VPN and send **SMS notifications**. Cabled connection is also available, via customer's LAN.
N.B.: MyAngel24™ activation on demand.

Diagnostics

With **MyAngel24™**, the climatic chambers stay connected to the remote server 24 hours a day, monitoring running conditions in order to guarantee faster and more efficient service and maintenance activities.

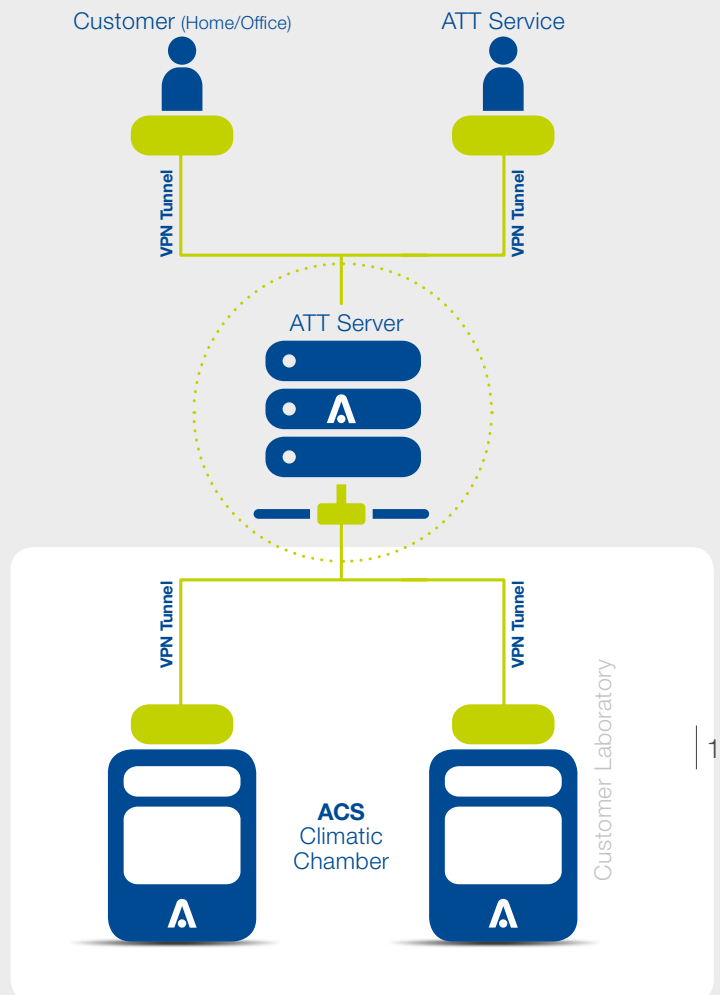

Accessibility

With **MyAngel24™**, you can stay in contact with the climatic chamber whenever you want and wherever you are, accessing its control panel from any web browser.

Safety

MyAngel24™ uses the highest security standards available for authentication, secure connection, data encryption and storage. Moreover, you can suspend or limit the data sent to the central server for security reasons during one or more test sessions.

ACS Climatic Chamber

Customer Laboratory

Maintenance Cost Reduction

● **Less on-site intervention**
- **MyAngel24™** permits the identification of problems with a remote test and an examination of the recorded data

- ACS can diagnose many problems remotely ensuring the service engineers know how to resolve the problem before visiting site and in some instances avoiding the need for a site visit.

● **Reduced chamber downtime**
- ACS is able to schedule maintenance to chamber test plan and life cycle monitoring of the main components

● **Efficient on site intervention**
- Service staff know the problem and which parts may require replacing before attending site
● **Remote support**
- ACS can adjust PID parameters remotely
- ACS can make changes to PLC programs remotely for chamber optimisation.
Angelantoni Test Technologies, owned by the **Angelantoni Group**, is the only company capable of offering a comprehensive range of environmental test chambers - **ACS** branded - for a great variety of applications, thanks to the expertise and technical know-how of its teams of experts. Innovation, flexibility and organization have always been the keys to success for ACS, world-famous since 1952 also for its high-tech test equipment such as Thermal High Vacuum Chambers for Aerospace applications and Calorimeters.
