

EN 50155 Managed PoE Routing Switch

Viper-212A-P8-LV

- 12×100 Mbps, whereof 8 PoE ports
- IEEE 802.3af/at (PoE/PoE+)
- **■** Designed and built for extreme operational environments
 - Robustness-enhancing design features
 - Extensive range of approvals, by IEC/ISO 17025 certified laboratories
 - · Quality-focused engineering and production located in Sweden
- Powered by WeOS, Westermo's proven network operating system
 - Strong set of protocols and functions, including layer 3 routing, DHCP (server and client), VRRP
 - · High level cyber security

offer effective powering of end-devices.

· Easy to use

EN 50155

EN 50121-3-2

EN 45545-2

The Viper is designed to withstand the tough environment on-board trains, exposing the switch to constant vibration, extreme temperatures, humidity and a demanding electrical environment.

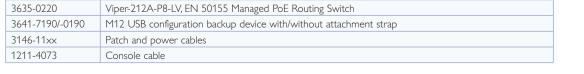

A GORE-TEX® membrane prevents internal condensation. Threading integrated in chassis provides for additional vibration resistance. High-level isolation between all interfaces enables direct connectivity to vehicle auxiliary power and protects against overvoltage and flashover. IP67 protection prevents ingress of water and dust. An overall optimised design results in an extremely compact package in combination with very high MTBF for easy integration and low lifecycle cost.

Thorough type testing at independent labs certify the compliance to a wide range of standards, not least EN 50155, where the highest class is achieved in all aspects. The state-of-the-art Westermo production facility ensures the quality of each individual unit, e.g. through temperature cycling burn-in testing.

The WeOS operating system offers an extensive suite of IP networking features for resilient and flexible networks, e.g. the FRNT ring protocol with very fast failover on 100 Mbps. The powerful layer 3 routing capability is very useful for separating networks in complex applications. The backup device accessory matches the Viper in robustness and offers easy configuration update and

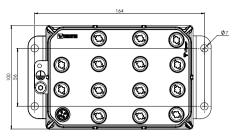

Meeting the requirements of the railcar market, the Viper is very well suited for deployment in any other application with severe operating conditions and tough environments, for instance in the mining industry.

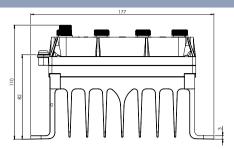

Ordering Information		
Art.no	Description	
3635-0220	Viper-212A-P8-LV, EN 50155 Managed PoE Routing Switch	
3641-7190/-0190	M12 USB configuration backup device with/without attachment strap	
3146-11xx	Patch and power cables	
1211-4073	Console cable	

Specifications – Viper 212A-P8-LV

Dimensional drawing

 $\textbf{Dimensions} \quad 177 \times 100 \times 110 \text{ mm } (6.97 \times 3.94 \times 4.33 \text{ in})$

Technical data	
Rated voltage	24 to 38 VDC
Operating voltage	16.8 to 49.4 VDC (14.4 to 53.2 VDC for 100 ms)
Rated current	3.7 A at 24 V and 2.4 A at 38 V
Rated PoE power	Max 61.6 W total; max 30 W on a single port
Power interruption	Class S2 (10 ms hold-up) for switch and connected PoE devices
X1 – X12, Ethernet ports	12x100 Mbps ports (whereof 8 PoE)
Backup and restore port	1 x USB
Console port	1 x RS-232
Operating temperature	-40 to +70°C (-40 to +158°F)
Storage & transport temperature	−55 to +85°C (−67 to +185°F)
MTBF	404,000 hours (MIL-HDBK-217F Notice 2)
Ingress protection	IP67
Weight	1.7 kg
