Fiber Inspection Reaches New Heights

The EXFO FIP-435B

Fully Automated Wi-Fi Fiber Inspection Probe

Turn your Android™ phone or tablet into a full-fledged connector inspection solution. Get fast, first-time-right results delivered through unmatched test ergonomics, giving you the freedom to inspect anywhere. Equip tower climbers installing and maintaining fiber-to-the-antenna (FTTA) networks with the perfect tool to eradicate this common cause of problems.

**Make sure you don't climb
the same mountain twice!**

Fully Automated. Wireless. Unrestricted.

100%
AUTOMATED

No matter your fiber testing experience, simply connect the probe and let it do all the work.

No wires. No heavy platform. No cumbersome power pack or adaptors. **Bring it with you anywhere!**

PASS

Connector endface pass/fail analysis based on industry standards (IEC, IPC).

● PASS
● FAIL
● STATUS
